Nonbinding sample calculation

! RISK ADVICE: No warranty is being given that the returns shown herein will indeed be achieved. Actual returns may be lower. Interest payments will not be made to holders of Bonds during the term of the Bonds and will instead be made as a bullet payment (Bullet Maturity). Hence, payments of principal and interest (including compound interest) will only be made either at the end of the term of the Bonds or in case of a termination for cause. Thus, the Bonds may offer the benefits of compound interest. On the other hand, a complete loss of invested funds is possible. Further, the Issuer may be unable to pay interest and compound interest. Because of qualified subordination and Bullet Maturity, redemption payments of principal and payments of interest as well as compound interest will depend on, inter alia, the solvency of the Issuer at Maturity Date or at any early redemption date. Taxes are neither considered nor deducted in this sample calculation.

Term	Interest
during the first 3 years	4 % p.a.
during the remaining term	8 % p.a. (Bullet Maturity)

Qualified Subordination shall have the meaning:

The obligations under the Bonds are ranking junior to obligations pursuant to unsubordinated financial instruments or other unsubordinated obligations of the Issuer. In the event of liquidation or insolvency of the Issuer or of any proceedings initiated in order to prevent an insolvency of the Issuer, the obligations of the Issuer under the Bonds are subordinated to the claims of all holders of unsubordinated obligations so that in any such event, payments in respect of the Bonds will not be made until all claims against the Issuer under obligations which rank senior to its obligations under the Bonds have been honoured in full. According to the terms and conditions, holders of Bonds shall agree at subscription that no insolvency proceedings against the Issuer are required to be initiated in relation to its obligations under the Bonds. The Bonds do not contribute to a determination whether the liabilities of the Issuer exceed its assets. Payments out of or in connection with the Bonds will not be made if and as long as the equity of the Issuer is negative or may become negative due to any payments to be made to bondholders under the Bonds.
